Data provided by NADA

* Estimated ACV is formulated by averaging the NADA Clean Trade-In and Clean Retail values.

** Borderline Alert is 70% of the NADA Clean Retail value, indicating a potential Total Loss.

This data is for information purposes only. All state and federal regulations in determining values of vehicles for settling auto claims must be applied by the insurance company. Estimated ACV and Borderline Alert are not to be used to determine the ACV of a vehicle. These are only approximate indicators and an adjuster should follow their own internal company policies in determining a total loss and coming to a settlement with their customer.
